Connex[®] Spot Monitor

Best in class vital signs, advanced patient safety features and seamless connectivity

Features that hit the spot

- Industry leading technology for superior accuracy and speed
- Measure blood pressure, pulse, SpO2 and thermometry
- BHS A/A validated SureBP[®] technology takes BP in 15 seconds
- Create up to 3 customised Early Warning Scores on the same device - such as nEWS, pEWS, etc.
- Supports adult, paediatric and neonatal patients
- Optional barcode scanner & wireless connectivity
- A central point of data entry for up to 20 patient parameters
- Online configuration tool - update devices with a USB stick or over a network
- Highly resistant to cleaning agents, including Clinell

Configure to your needs:

Thermometry:

- > Optional SureTemp[®] Plus or Braun[®] PRO 6000 Ear Thermometry

Pulse Oximetry:

- > Optional Nellcor, Masimo or Nonin SpO2

Wireless Connectivity

- > Wireless ready, or upgrade at a later stage

Barcode Scanner

- > Optional - for enhanced efficiency and patient safety

Mobile Stands

- > Advanced Power Management Stand with additional battery and storage
- > Classic Stand with cable management- *pictured*

WelchAllyn[®]

Easily connect to your EMR

As well as having close partnerships with over 90 Electronic Medical Record (EMR) providers globally, Welch Allyn also works with all leading UK e-observation software providers.

Early Warning Scores (EWS)

Customise, create and control with the CSM

- Capture and calculate patient scores at the bedside
- Fully customise, in line with your hospital's guidelines
- Switch between three scoring systems on the same device, such as nEWS & pEWS
- Based on the patient's EWS, the CSM can display escalation instructions to help the caregiver make rapid clinical decisions
- EWS data can be interfaced with electronic medical record systems automatically if desired
